

CAREER PROFILE

A results-driven and detail-oriented software engineer with broad experience in software development, debugging, software testing, system configuration, code scalability, compliance, and database management. Experienced in developing high-quality solutions through rigorous testing, legacy code refactoring, and application performance improvements. Collaborates effectively within dynamic team environments, delivering precise, scalable, and reliable software solutions. Committed to continuous learning and leveraging technical expertise to solve complex engineering challenges.

TECHNICAL SKILLS

**Languages:** C++, Java, Python, Rust, PHP, C#, SQL, BASH  
**Tools & Technologies:** Git, Spring Boot, Docker, React, RESTful APIs, Linux  
**Additional:** Agile/Scrum, Object-Oriented Programming

EXPERIENCE

PAYCOM

Grapevine, Texas

2025–2026

- Developed full stack features for the Client Relationship Manager system using PHP, React, TypeScript, MySQL, Docker, and Splunk, from requirements through testing and deployment with zero post-release defects.
- Enhanced lead-intake workflows by implementing client lead trackers for internal Client Relationship Manager system to improve client acquisition and data analytics used by 500+ sales representatives .
- Implemented maintenance improvements for Time-Off Management systems through bug fixes, legacy code updates, and feature-flag removals, supported by rigorous testing.
- Collaborated with an 8-person cross-functional engineering team to deliver new features, production bug fixes, and legacy code improvements in an Agile environment.

BAYLOR UNIVERSITY

Waco, Texas

2022–2025

Data Processor - Office of Admissions

- Efficiently processed and verified academic records for thousands of Baylor University applicants weekly.
- Maintained 90%+ departmental accuracy while entering transcript and admissions data under strict processing deadlines.
- Collaborated with admissions staff to resolve record discrepancies and maintain data integrity across multiple databases.

FAST ENTERPRISE

Santa Fe, New Mexico

2024

Software Engineer Intern

- Improved application performance by refining SQL queries in databases containing millions of sensitive records.
- Performed configuration checks to ensure system integrity and compliance with company standards.
- Upgraded systems by converting VB.NET functions to C#, enhancing code efficiency and future scalability.

PROJECTS

Meals to You

2025

- Created a web-based application that generates efficient delivery routes for a free-lunch program serving central Texas.
- Incorporated features such as user authentication and route management for an intuitive user experience.
- Utilized React, Flask, and SQL for frontend-backend integration to ensure reliable data management.

EDUCATION

BAYLOR UNIVERSITY

Waco, Texas

2021–2025

B.S., Computer Science

- National Society of Black Engineers - Nationals Planning Chair
- Alpha Phi Alpha Fraternity Inc. - Vice President
